Manuscript Formatting

Title Page: The exact format is unimportant because it will be changed upon computer formatting for electronic typesetting, but supply the following items, clearly differentiated, in the following order:

- Running head: a descriptive condensation of the title (80 character limit) in all capital letters.
- Title, in all capital letters.
- List of authors, in all capital letters, all in a single paragraph, with first names then initials, marked by superscripts to identify addresses.
- List of addresses, in capital and lower-case letters, superscripted to correspond to the list of authors (use asterisks to indicate current address when different from original address). Also include the e-mail address of the corresponding author.
- Five key words.

Format of Manuscript: The manuscript should be typed double spaced, including abstracts, text, references, and figure captions. All pages must be numbered beginning with the abstract through the figure captions. Tables and figures should not be included in the numbered pages. Tables should have captions, but figure captions should be included at the end of the text. Non-native English speakers are encouraged to have their manuscripts critiqued by a native English speaker prior to submission.

In the text, first-order headings are **Bold CAPITALS CENTERED**; second-order headings are *Italic Capitals and Lower-Case Letters Centered*; third-order headings are **Bold Roman Capitals and lower-case** letters, at beginning of indented paragraph, followed by a period and three hyphens. In the text the word figure is capitalized and spelled out, e.g., Figure 1; it is capitalized and abbreviated when used parenthetically, e.g., (Fig. 1).
